About me

Skilled and highly creative Senior UI & UX / Product Designer with a consistently successful record of conceptualising and designing leading-edge print, digital and mobile material for international corporate clients.

In my journey, I've had the opportunity to work in both startup and enterprise environments on projects related to cyber security, bidding, e-commerce and entertainment.

Coming from a background in both engineering and design, I love connecting the dots between business goals, technical constraints and user satisfaction.

Interpersonal skills

Excellent communication skills, displaying professionalism with good humour and a proactive approach; objectively critiquing designs with constructive feedback.

Meeting and liaising directly with clients and stakeholders, correctly interpreting briefs and translating back to the business; compiling schedules of work; regularly keeping clients informed about project status.

Liaising with third parties, managing the outsourcing of work; acting as a link between the client and company by maintaining regular contact, ensuring that the communication flows effectively.

Experience

SENIOR UX / UI DESIGNER & DEVELOPER / [APOMATIX LTD \(UK\)](#)

JUL 2018 - Present

Worked for the Cyber Security Start-up company on creating their Audit Platform and redesign their website from scratch. The project involved working with stakeholders and CEO across Apomatix to conduct needfinding, creating a new information architecture schema and content strategy, and designing sketches, flow diagrams, wireframes and interactive prototypes.

Planned and implemented inbound and outbound marketing strategy, documentation and collateral. Assisted rebranding of the company, website, email marketing, advertising, and print materials. Worked with developers team to design and implement product features.

Coaching and mentoring junior designers; presenting demonstrations to clients and internal staff prior to the release of products and design of new platform.

UX / UI DESIGNER & FRONT END DEVELOPER / [CARGIANT LTD \(UK\)](#)

MAR 2018 - JUN 2018

Worked on a short term contract to redesign various pages of their website (www.cargiant.co.uk). The project involved working with products and marketing departments as well as stakeholders to create and designing sketches, flow diagrams, wireframes, and interactive prototypes. Also developed the Front-End of the pages on Umbraco CMS.

UX & UI DESIGNER / FRONT END DEVELOPER / [ATG MEDIA LTD \(UK\)](#)

NOV 2010 - FEB 2018

Responsible for maintaining and developing new features for our four portals (the-saleroom.com, i-bidder.com, bidspotter.co.uk and bidspotter.com) also ensuring they are user-friendly and fully responsive for Mobile and Tablet; improving the user experience and bidding process, updating to the latest software/applications.

Evaluate survey/test results, conduct discovery sessions with key stakeholders while designing wireframes, mock-ups and creating dynamic prototypes according to requirements. Socialize prototypes/mock ups and apply feedbacks. Organise A/B tests. Advocate UX within the company and educate the company about UX while creating long term product vision together with Head of Product.
